Raj Breno

UX & Design Engineer.

I design like a designer and ship like an engineer.

Designing and building products across web, mobile, SaaS, and AI. Because design and engineering live in the same pair of hands, the thing that ships is the thing that was drawn - no handoff delays, no translation loss. 7 years of work experience.

What I ship:

- Product design, UX research, and prototyping
- AI platforms
- Web and mobile applications
- SaaS platforms

Helping **businesses ship products that feel good to use and land fast.**
